AMENDED COMPLAINT

Plaintiffs Mallinckrodt LLC, Mallinckrodt Inc. (collectively and individually, “Mallinckrodt”) and Depomed Inc. (together with Mallinckrodt, collectively “Plaintiffs”), by their undersigned attorneys, for their Amended Complaint against Defendant Actavis Laboratories FL, Inc. (“Actavis” or “Defendant”), herein allege:

NATURE OF ACTION

1. This is an action for patent infringement under the patent laws of the United States, Title 35 of the United States Code, arising from Actavis filing an Abbreviated New Drug Application (“ANDA”) with the United States Food and Drug Administration (“FDA”) seeking

approval to market generic versions of Plaintiffs' pharmaceutical product XARTEMIS™ XR prior to the expiration of United States Patent Nos. 8,597,681 ("the '681 patent"); 8,658,631 ("the '631 patent"); 8,741,885 ("the '885 patent"); 8,980,319 ("the '319 patent"); 8,992,975 ("the '975 patent"); 7,976,870 ("the '870 patent"); 8,668,929 ("the '929 patent"); 8,372,432 ("the '432 patent"); 8,377,453 ("the '453 patent"); 8,394,408 ("the '408 patent"); and 9,050,335 ("the '335 patent").

PARTIES

2. Plaintiff Mallinckrodt LLC is a limited liability company organized and existing under the laws of the State of Delaware, having a place of business at 675 McDonnell Boulevard, Hazelwood, Missouri 63042-2379.

3. Plaintiff Mallinckrodt Inc. is a corporation organized and existing under the laws of the State of Delaware, having a place of business at 675 McDonnell Boulevard, Hazelwood, Missouri 63042-2379.

4. Plaintiff Depomed, Inc. ("Depomed") is a corporation organized and existing under the laws of the State of California, having a place of business at 7999 Gateway Blvd., Suite 300, Newark, CA 94560.

5. On information and belief, Defendant Actavis Laboratories FL, Inc., is a company organized and existing under the laws of the State of Florida with a principal place of business at Morris Corporate Center III, 400 Interpace Parkway, Parsippany, NJ 07054. On information and belief, Actavis is in the business of selling generic pharmaceutical products, which it distributes in the State of New Jersey and throughout the United States.

6. On information and belief, Actavis has previously submitted to the jurisdiction of this Court and has purposefully availed itself of the jurisdiction of this Court by filing lawsuits

and/or asserting counterclaims in lawsuits filed in the United States District Court for the District of New Jersey.

JURISDICTION AND VENUE

7. This Court has subject matter jurisdiction over this action pursuant to 28 U.S.C. §§ 1331 and 1338(a).

8. This Court has personal jurisdiction over Actavis by virtue of, inter alia, it having corporate presence in New Jersey, having conducted business in New Jersey, having availed itself of the rights and benefits of New Jersey law, previously consenting to personal jurisdiction in this Court, availing itself of the jurisdiction of this Court, and having engaged in systematic and continuous contacts with the State of New Jersey.

9. Venue is proper in this District pursuant to 28 U.S.C. §§ 1391 and 1400(b).

XARTEMIS™ XR

10. XARTEMIS™ XR is an extended release tablet for oral administration. XARTEMIS™ XR contains the active ingredients oxycodone hydrochloride and acetaminophen. The recommended dose of XARTEMIS™ XR is one dose every 12 hours without regard to the patients' fed state. XARTEMIS™ XR is indicated for the management of acute pain severe enough to require opioid treatment and for which alternative treatment options are inadequate.

11. XARTEMIS™ XR combines an opioid analgesic agent with a non-opioid analgesic agent. XARTEMIS™ XR provides the advantage of additive and synergistic analgesic effects allowing for a lower dose of opioid, fewer side effects, and the ability to treat a broader spectrum of pain or pain states due to the different mechanisms of actions.

12. Previously marketed drug products delivered the combination drugs as an immediate release product.

13. This limitation required the drug product to be administered frequently and/or continuously throughout the day (or night) for continuous pain management. This frequent and/or continuous dosing is often inconvenient and difficult to maintain. Regular dosing is, therefore, inconvenient and frequently leads to poor patient compliance – potentially resulting in a dose being taken after pain breaks through, causing unnecessary pain and suffering.

14. During drug development, it was surprisingly discovered that a pharmaceutically acceptable gastric retentive dosage form can be formulated to provide release in the stomach of a combination of a sparingly soluble drug and a highly soluble drug at rates proportional to one another over an extended period of time.

15. In 2008, Mallinckrodt licensed from Depomed patents, a patent application, and know-how and subsequent to completion of drug product development Mallinckrodt sought approval from the FDA to market XARTEMIS™ XR in the United States. The FDA approved Mallinckrodt's New Drug Application No. 204031 ("the XARTEMIS™ XR NDA") for oxycodone hydrochloride and acetaminophen extended-release tablets, under the trade name XARTEMIS™ XR, on March 11, 2014.

16. As a part of the regulatory process for obtaining approval of the XARTEMIS™ XR NDA, Mallinckrodt was required by the FDA to submit a proposed label for the drug. See 21 C.F.R. § 201.56(b). The label for XARTEMIS™ XR instructs physicians and patients, inter alia, about the proper dosage and administration of XARTEMIS™ XR.

17. The label for XARTEMIS™ XR indicates, inter alia, that one dose of XARTEMIS™ XR is recommended twice daily.

18. A physician familiar with the use of extended-release tablets for the management of acute pain such as XARTEMIS™ XR would therefore understand that administration of an

opioid analgesic combined with a non-opioid analgesic agent would be subject to the label's instruction to administer a dose twice daily.

19. Plaintiffs have educated prescribing physicians regarding the use of XARTEMISTM XR. Physicians are informed that the recommended dose of XARTEMISTM XR is one dose every 12 hours. Physicians are told that the second dose may be administered as early as 8 hours after the initial dose if patients require analgesia at that time. Subsequent doses are to be administered every 12 hours. Further, on information and belief, it is the standard of care for physicians to treat acute pain in a manner that prevents pain break through. One or more claims of the patents in suit cover the method of treating pain by administering oxycodone hydrochloride and acetaminophen extended-release every 8-12 hours or twice daily.
